ekokimya

Ekokimya was established in 2009 with the aim of producing friendly to the earth cleaning and organically personal care products. We serve for our own brands. Besides, our private label production provide professional service for local and foreign brands.

Since the day Ekokimya was established, in order for a better world, we have been working non-stop and eagerly in our 2000m² production area in which 500 ton production can be made and 600.000 bottle can be filled.

We have two separate and independent production lines each for detergent and cosmetics.

*100ml- 1000ml filling range in detergent
5ml- 500 ml filling range in cosmetics.*

The production processes such as R&D activities, supplying of raw material and packing, production and filling are all done meticulously within our constitution by our team of experts.

ekokimya

We have two laboratories in our manufacturing site: one of them is R&D Laboratory and the other Quality Control Laboratory

Our specialist Chemists and Engineers are working cooperatively with academic persons that expert in outstanding universities in Turkey

With having high-tech devices, we are able to make all kinds of physical and chemical analysis in our own constitution. In this way, we can offer solution more quickly and economic

As part of TEYDEB 1507, our two projects are supported by TUBITAK (The Scientific and Technological Research Council of Turkey)

Ecological Dishwasher Detergent, which is developed within TUBITAK support, has been finalist of SME Innovative Eco-Friendly Award 2011

ekokimya

R&D

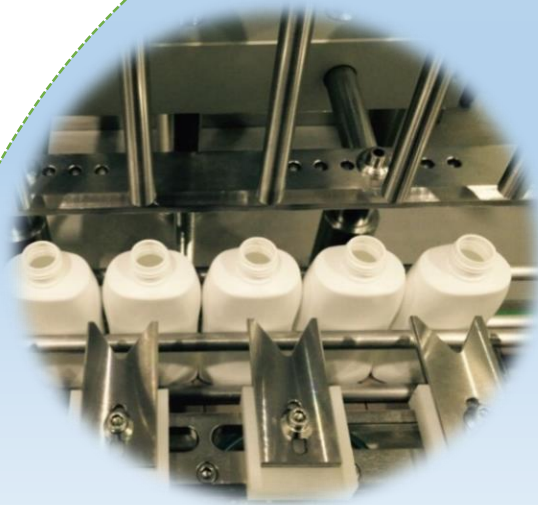

With having high-tech devices in our laboratories, we are able to make all kinds of physical and chemical analysis in our own constitution. In this way, we can offer solution more quickly and economic in addition to we can prepare special formulations or help to improve your product.

Raw Material and Packaging

Supplying of raw material and packaging is quite important for Private Label; we can manage all these processes in your stead and offer change to making use of raw material and packages in our stock. Managing these important processes by attorney gives you an opportunity for making more economic and feasible purchasing. Furthermore, you will save time with assigning these processes to us

ekokimya

Production

Having production facility that includes 2000 M2 closed area, we are able to produce 500-ton product or fill 600,000-ton bottle. As one of industry-leading company, to serving best quality product has GMP, ISO9001:2008 and ISO14001:2004 certificates

Filling and packing

The last two stages of the production process, the bottling (primary packaging) and packaging (secondary packaging) is completely made within our constitution and so the production made on fully automatic production lines according to highest standards of GMP
